SKILLS

Programming Languages	C, C++, Java, Python, JavaScript
Core CS	DSA, OOP, DBMS, Operating Systems, Computer Networks
Web Technologies	HTML5, CSS3, Tailwind CSS, React.js, Node.js, Next.js, Express.js
Databases	MongoDB, MySQL, PostgreSQL
Soft Skills	Problem Solving, Analytical Thinking, Communication, Leadership, Team Collaboration

EXPERIENCE

FUZO | *Freelance Software Engineer* | *Live* Aug' 2026 – Present

- Developed a full-stack Next.js application with authentication, chat, rewards, and user management across 16 routes.
- Architected a Supabase backend for authentication, PostgreSQL data access, real-time messaging, and REST APIs.
- Integrated Google Places, Gemini AI, YouTube, and Directions APIs to power AI-driven and location-aware features.
- Revamped the UI/UX across user settings, profile, and dashboard pages for a more intuitive and responsive experience.
- Designed a dynamic leaderboard with scope and time-based rankings using live backend data.
- Streamlined frontend-backend communication by building reusable API services and typed request flows across the application.

SSB with ISV | *Freelance Software Engineer* | *Live* Jul' 2026 – Present

- Migrated four MERN repositories into a unified Next.js platform with 140+ backend API routes.
- Engineered JWT, OTP, and OAuth authentication (Google, Facebook, LinkedIn, Apple) for 940+ production users.
- Integrated Zoho CRM, Razorpay, and third-party REST APIs to streamline customer onboarding and payments.
- Automated a 75-test Playwright E2E suite achieving a 100% pass rate across production releases.
- Deployed applications on a VPS using PM2, Nginx, and Cloudflare with zero-downtime deployment.
- Configured CI/CD workflows and deployment pipelines to streamline production releases and reduce manual deployment effort.

PROJECTS

FlagFlow – Feature Flag Management System | *GitHub* Aug' 2026 – Present

- Built a React.js, Node.js, and MongoDB feature flag platform with 14 REST APIs for auth, flags, teams, and audits.
- Established multi-tenant architecture isolating feature flags, members, and audit logs across organizations.
- Secured dashboard and client applications using JWT authentication and API-key middleware.
- Optimized flag evaluation with a single-request API returning all user feature flags.
- Introduced 3-role RBAC with secure email invitations and 48-hour expiring onboarding tokens.
- Leveraged React Context and custom hooks to deliver centralized feature flag state management across the dashboard.

EcoPickup – Smart Waste Management System | *GitHub* Mar' 2026 – May' 2026

- Collaborated with a team to build a React.js, Node.js, MongoDB, and Socket.io waste management platform.
- Enabled JWT-based RBAC with bcrypt authentication for Users, Workers, and Admins.
- Enhanced real-time task updates between users and workers using Socket.io.
- Delivered responsive dashboards and REST APIs to streamline waste collection workflows.
- Refined the MongoDB schema to improve maintainability, scalability, and backend performance.
- Coordinated with teammates using Git and GitHub to manage feature development, code reviews, and project integration.

CERTIFICATES

Database Management System Part-1 Infosys Springboard	Aug' 2026
JavaScript Developer Certification FreeCodeCamp	Apr' 2026
GenAI Fundamentals Disha AI	Jun' 2025
SQL (Intermediate) HackerRank	May' 2025

ACHIEVEMENTS

Secured 1st Place in the Algo Arena 2.0 coding hackathon among 1,000+ participants.	Apr' 2026
Awarded the University Honour Roll for excellent academic performance (Academic Year 2023–24).	Nov' 2025
Secured 1st Runner-Up in a presentation competition on Tech Giants organized by LPU CPE.	Nov' 2024

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology in Computer Science and Engineering; CGPA: 9.00/10	Aug' 2024 – Present
Lucknow Public School	Lucknow, Uttar Pradesh
Senior Secondary (CBSE); Percentage: 87%	2023
Blooming Buds School	Sant Kabir Nagar, Uttar Pradesh
Secondary (CBSE); Percentage: 85%	2021
